ELGA PURELAB[®] Classic DI

The PURELAB Classic DI system combines high performance with economy to deliver 18.2 MΩ-cm type I ultrapure water at a very cost-effective price. The PURELAB Classic contains many market leading features to deliver consistent and reliable water purity.

Features:

- Ultrapure type I water at very economic costs for the equipment and the cost of ownership
- Automatic intermittent recirculation minimizes temperature build-up and optimizes microbial performance
- Very easy to maintain – incorporates 'fast rinse' ultra-filter
- Upgradable from single pack to twin pack to twin pack purification
- Suitable for all life science and analytical applications
